

Corporate Couriers Logistics has partnered with Canada's leading carbon management solutions provider, Offsetters, to understand, reduce, track, and offset our climate impact. Through the rigorous industry standard protocols of the World Resources Institute, Corporate Couriers Logistics is proud to have earned the title of a Climate Friendly company that offers our customers a carbon neutral delivery option. As part of our commitment to climate change, Corporate Couriers Logistics also offers our clients carbon footprint reporting on a monthly or annual basis.

For more information on our sustainability practices please contact Corporate Couriers Logistics at 604.685.5900.

Corporate Couriers Logistics is Vancouver's premier same day courier company, proudly serving the Lower Mainland since 1980.

With the largest fleet of bicycles and vehicles in the city, we offer superior on-time, same day delivery throughout the Metro Vancouver Area and to most points within British Columbia. We also offer services across Canada and worldwide.

With over 30 years of experience, our company's commitment to our customers is to make sure every package is delivered safely and securely. We are proud to be the winner of the Consumers' Choice Award for Best Local Courier Service 10 years in a row.

COMMITTED TO PROFESSIONALISM

Our fleet includes over 150 vehicles and bike couriers. We understand that your delivery person is an extension of your company's image. All of our drivers and bikers are 100% uniformed. Internal audits are conducted on a frequent basis to insure compliance. Our reputation of high quality service, security and professionalism is represented every time we deliver your package.

ON-DEMAND SERVICES

We know you want deliveries that are fast and worry-free. Our year-to-date statistics indicate our on-time delivery performance at over 97%. This can only be accomplished by offering services above and beyond most courier services. We offer same day service as well as overnight services throughout Vancouver, British Columbia, Canada, and worldwide.

FLEET OUTSOURCE SERVICES

Outsourcing is the most effective way for your company to cut costs and increase productivity levels. By working with Corporate Couriers Logistics you will save on personnel, vehicle-related expenses and the headaches of managing your own fleet of drivers. Typically, through outsourcing, Corporate Couriers Logistics is able to save its clients anywhere from 18 to 40% annually.

MEDICAL INDUSTRY EXPERIENCE

Corporate Couriers Logistics brings expertise in delivery services to hospitals, laboratories and medical facilities. With a professionally trained team of couriers, we can provide you with same-day pick-up and delivery that's secure and reliable.

The same award-winning service, combined with superior technology, plans, routes, and tracks each shipment with unsurpassed efficiency. Your chain of custody is never compromised.

TECHNOLOGY DRIVES US

At Corporate Couriers Logistics we pride ourselves on having the most advanced technology in the market. Our courier specific software program allows our customers to place orders online, trace their shipments through GPS tracking, and customize their billing and reporting.

- Drivers utilize hand-held mobile voice and data "Blackberry" units
- GPS tracking — we know where your shipment is at all times
- Bar-code scanning and signature capture available
- Route optimization software
- On-line order entry
- Ability to create, edit, and print shipping labels
- Customizable reporting functions
- Customizable invoices to accommodate your needs
- E-billing to save time and reduce our impact on the environment
- Real-time tracking and proof of delivery

SECURITY YOU CAN TRUST

We provide our customers peace of mind with our advanced security features:

- All drivers & bikers are 100% uniformed to ensure the security of your package and workplace.
- All servers, workstations, and communication systems are protected against power outages — generators are in place to continue operations without any disruption.
- Off-site back up of servers every night.
- Drivers trained to properly secure their vehicles.
- Software firewalled making it virtually impenetrable — protecting customer data.
